Biographical Sketch:

Dr. rer. nat. Susanne Lux studied Molecular Medicine at the University of Ulm, Germany. She received her Ph.D. degree from Ulm University in August 2019. Her doctoral work in the laboratory of Prof. Dr. Lars Bullinger focused on circular RNAs in Acute Myeloid Leukemia. In September 2019, she joined the group of Dr. Michael Milsom at the DKFZ Heidelberg, Germany, as a postdoctoral fellow.

Since December 2019, Dr. Susanne Lux has been spokesperson of the DKFZ PostDoc Network (DKFZ PDN). Susanne is a member of the European Hematology Association (EHA), the American Association for Cancer Research (AACR), the Society of German Natural Scientists and Doctors (Gesellschaft Deutscher Naturforscher und Ärzte, GDNÄ) and the German Physical Society (Deutsche Physikalische Gesellschaft, DPG) and she serves as a referee for the Journal of Molecular Medicine. She was previously awarded with scholarships from the Studienstiftung des Deutschen Volkes and the Deutschlandstipendium and is currently holding a DKFZ Postdoctoral Fellowship.

Research Focus:

Deciphering the role of the transcription factor Evi1 in modulating the DNA damage response in Fanconi anemia pathway-deficient and DNA repair proficient hematopoietic stem and progenitor cells.
